

Education

The Blue Reef Aquarium group attracts over 30,000 educational visitors per annum – many of these are repeat visits. Our success has always been our attention to detail and working with each group to ensure we meet their specific needs.

Each year Blue Reef Aquarium, Hastings welcomes more than 4,500 educational visitors, making it one of the UK's most popular marine based resources for schools.

Highlights of any visit include the giant pacific octopus and the spectacular ocean reef display, complete with its own underwater walkthrough tunnel. More than 40 other naturally-themed displays are home to everything from crabs and lobsters to jellyfish, seahorses and moray eels.
